

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

OUR FOOD SUPPLY MUST BE CONSERVED. PHYSICIANS, nurses, health officers, housewives, dietitians, bacteriologists, specialists in the medical field, and others can gain information on how to deal with food poisoning in its various forms and how to prevent its occurrence, in the new volume

FOOD POISONING

By EDWIN OAKES JORDAN

Chairman of the Department of Hygiene and Bacteriology
The University of Chicago

\$1.00, postage extra (weight 11 oz.)

Physicians. Every physician feels the lack of time for sufficient reading to keep up with current progress in different lines of medicine. This book gives in concise form the types of food poisoning and discusses recent investigations in diseases due to food poisoning. A number of the most characteristic and best studied outbreaks of food poisoning are described. Over one hundred references to original sources are given.

Nurses. The frequently fatal outcome of some forms of food poisoning—if vigorous emergency measures are not carried out—makes prompt diagnosis of the malady on the part of doctors or nurses exceedingly desirable. The different types of food poisoning, their causes, the symptoms, treatment, and means of prevention are briefly and clearly presented in this book.

Health Officers. Health officers have an excellent opportunity to improve the sanitary conditions which are frequently responsible for food poisoning and to educate laymen in avoiding the possibility of infection. In this book special emphasis is laid on means of prevention in the discussion of each form of poisoning.

Housewives. It is of vital interest to the housewife not to waste food by careless treatment. To mention but one point: the proportion of illness due to uncooked, imperfectly cooked, or raw food, which could easily be avoided by proper cooking, is astonishing. Professor Jordan lays special stress on this feature. The particular foods involved, how they become poisonous, and how to avoid the possibility of poisoning are all clearly explained in this book.

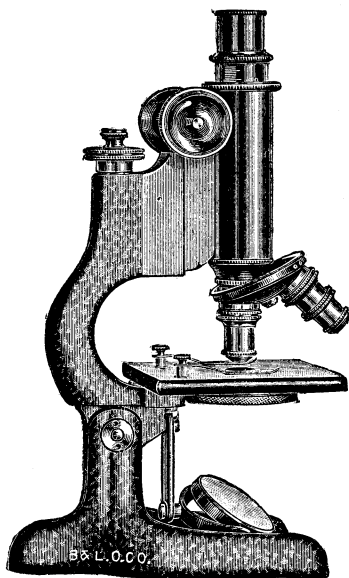

Dietitians. As a basis for a series of lectures on the subject of food poisoning this volume is of great value. For personal use it is of equal importance.

Bacteriologists. The results of various researches and studies, both in this country and abroad, will be of particular interest to bacteriologists.

Specialists. An hour or two devoted to this interesting and vivid account of the causes and difficulties of food poisoning will give the busy medical specialist a bird's-eye view of the whole subject of food poisoning.

"Housekeepers, nurses, physicians, as well as the victims of organic 'attacks of indigestion, will find in the pages of this volume much of illumination."—*The Survey*

Get Optical Accuracy and Durability at a Moderate Price

Insure yourself these essentials of a good microscope by making your selection from the many models of

Bausch ^{and} Lomb Microscopes

The experience of more than sixty years in the manufacture of the highest grade optical products guarantees optical accuracy, efficiency and durability. You benefit by the latest achievements in instrument construction.

Make your selection from our many models, ranging from instruments for ordinary classroom work to those for the most scientific laboratory analysis and experiments.

Model F-2 shown above has a fine adjustment of the lever type, providing the slow movement required for higher powers. Ample space for object manipulation. Base and arm finished in our new crystal black, reagent-proof and unusually durable. Price \$31.50.

Fully illustrated descriptive matter of all models sent on request.
